## PROJECTS

**Bus Reservation Simulation System**— Build using Java and MySQL Database

Github : [\[Java Backend Project Repository\]](#)

Developed a Bus Reservation System using Java and MySQL. This system allows users to easily search for book tickets, cancel reservations, and view bus information..

**Fruit shop**— Build using Html, Tailwind css and React js

Github : [\[Fruit shop website\]](#)

Developed a modern, responsive fruit shop website using HTML, Tailwind CSS, and React.js. The site features dynamic product listings, an intuitive user interface, and interactive elements like a search bar and shopping cart. Styled with Tailwind CSS to ensure a clean, consistent design.

**Portfolio**— Build using Html, Css, JavaScript

Created a personal portfolio showcasing my web development projects, with interactive and responsive designs throughout. The portfolio features distinct sections like 'About', 'Projects', and 'Contact' for easy navigation.

Highlights frontend skills, clean code, and UI/UX design principles, presenting a professional and engaging portfolio.
